Application for the position of Network Engineer

Dear Chris,

As an experienced network analyst, I would like to apply for the role of Network Engineer at Priwoo Labs with interest. Having experience over 5+ years as a network administrator and network professional, I am confident that I meet all of your requirements as a candidate. Also, it is a pleasure to tell you that I am highly skilled in making local area networks (LANs), wide area networks (WANs), voice over internet protocol network (VoIP), intranets and extranets.

In my previous employment, I gained fabulous knowledge on telecommunication, network infrastructure, network hardware selection, installation and maintenance. On-the-job experience excels me at problem-solving skills, analytical skills, attention-to-detail and multitasking skills. Most of the time I spent a lot of work time on the maintenance of networks, installation and configuration of network devices, troubleshot to find the problems in the network, implemented new network integrations which resulted in increasing network efficiency and cut down on latency by 25% and for this accomplishment once I was awarded Employee of the Month.

I have been consistently appreciated by the chief technology officer (CTO) in my previous workplace as a network all-rounder which helped me to boost my passion and enthusiasm to reach higher positions in my network career. I believe my excellent knowledge in routing and switching, DNS, IoT and MPLS would be an amazing qualification to join with you as a Network Engineer. As a CCNA and CCNP certificates holder I know how to find the best solutions for your current network issues at the company.

I wish that I am the exact person you are looking for and would like to discuss this position with you in person. Contact me at the given contact details at any time to arrange a convenient meeting time. Thank you for your consideration.

Sincerely,

Miranda Jansson
